

Reevaluation Eligibility Determination

SYNTHETIC DEVELOPMENT RECORD — NOT A REAL STUDENT

Student Information

Student:	Caleb Nguyen
Date of Birth:	2016-03-09
Grade:	5
School:	Synthetic Elementary School
District:	Synthetic District

Meeting / Determination Information

Determination Date:	2026-10-14
Determination Type:	Reevaluation Eligibility Determination
Determination By:	Eligibility team

This document records an educational eligibility determination. It is not a medical diagnosis.

Evaluation Evidence Reviewed

- ☒ Psychoeducational Reevaluation - 2026-09-22
- ☒ Academic Reevaluation - 2026-09-29
- ☒ Speech-Language Review - 2026-10-06
- ☒ Review of existing educational records

Summary of Relevant Evidence

Current academic reevaluation results include oral reading fluency of 104 WCPM and reading accuracy of 97%. These oral reading results are stronger than earlier instructional records. Reading comprehension, measured with a standardized achievement subtest, yielded a standard score of 78, which is below age-based expectations.

Psychoeducational evidence indicates cognitive ability is broadly within the average range. A global cognitive limitation is not identified as the primary explanation. No separate speech-language educational need is identified from this review.

The educational concern that remains most evident is reading comprehension. Caleb continues to have difficulty constructing meaning from grade-level passages even when oral reading rate and accuracy are stronger.

Eligibility Determination

- ☒ Student continues to meet criteria for special education
- ☐ Student no longer meets criteria for special education

Eligibility Category:	Specific Learning Disability (SLD) - Reading
Primary Educational Need:	Reading Comprehension
Category Change:	None. Eligibility category is unchanged.

The student continues to meet criteria for Specific Learning Disability (SLD) - Reading. This is an educational eligibility determination, not a medical diagnosis. Eligibility category is unchanged. Primary educational need: Reading Comprehension.

Educational Need for Specially Designed Instruction

The team determined that Caleb Nguyen continues to require specially designed instruction targeting the documented reading comprehension need.

Team Conclusion

Current academic reevaluation documents oral reading fluency of 104 WCPM and reading accuracy of 97 percent, with a reading comprehension standard score of 78. Fluency and accuracy are stronger than earlier instructional records. Persistent weakness is now most evident in reading comprehension. Psychoeducational evidence indicates cognitive ability is broadly within the average range. The speech-language review identifies no separate speech-language educational need and does not recommend a speech-language service. The team determined that Caleb continues to require specially designed instruction to address the documented reading comprehension need. The eligibility category has not changed.
