

Prior Written Notice

SYNTHETIC DEVELOPMENT RECORD — NOT A REAL STUDENT

Student / Notice Information

Student:	Jordan Ellis
Date of Birth:	2013-06-12
Grade:	6
School:	Synthetic Middle School
District:	Synthetic District
Notice Date:	2025-11-12
Document Type:	Prior Written Notice
Action:	Proposed IEP amendment and BIP implementation

This Prior Written Notice records the meeting decision concerning Jordan Ellis. It provides rationale and context. It is not the amended IEP itself and does not replace the IEP.

Description of Action Proposed

- Implement the Behavior Intervention Plan dated 2025-11-03.
- Amend selected IEP sections only.
- Add behavior-related supports: visual task checklist, assignment chunking, and access to a help/break card.
- Add behavior consultation.

Behavior consultation: 1 session per week, 20 minutes per session.

Proposed supports include a visual task checklist, assignment chunking for extended independent written tasks, and access to a help/break card.

Explanation of Why the Action Is Proposed

Observational data, the Functional Behavior Assessment hypothesis, and the Behavior Intervention Plan support adding selected behavior supports without changing eligibility, specialized reading, or extended time.

Classroom observation, the Functional Behavior Assessment, and the Behavior Intervention Plan document a need for selected behavior supports for Jordan. Eligibility, specialized reading instruction, and extended time are not proposed for change.

Description of Other Options Considered

The team considered continuing without a formal behavior plan. That option was not selected because observational data showed recurring task refusal during independent written work.

What This Notice Is Not

- This notice is not the IEP amendment.
- This notice is not a complete IEP.
- This notice does not remove specialized reading or extended time.
- This notice does not report that the BIP has already succeeded.
