

Psychoeducational Evaluation Report

SYNTHETIC DEVELOPMENT RECORD — NOT A REAL STUDENT

Student Information

Student:	Maya Carter
Date of Birth:	2017-04-18
Grade:	2
School:	Synthetic Elementary School
District:	Synthetic District
Evaluation Date:	2024-10-15
Evaluator:	School psychologist

Reason for Referral

Maya was referred because of persistent difficulty reading connected grade-level text accurately and fluently. The primary referral concern remains reading fluency.

This psychoeducational evaluation reviews existing educational information and classroom functioning.

Sources of Information

Information available to the evaluator on the evaluation date includes the initial referral, teacher description of classroom reading performance, parent consent for initial evaluation, and direct observation of the student during the evaluation session.

- Initial referral for special education evaluation
- Teacher information regarding classroom reading tasks
- Parent consent for the initial evaluation
- Student observation during the evaluation session

Behavioral / Evaluation Observations

Maya participated in classroom discussion and understood ordinary verbal directions during the evaluation. Cooperation and engagement were adequate for completing requested tasks. No observation in this evaluation indicated that a global cognitive limitation is the primary explanation for the reading-fluency concern.

Teacher information indicates that the reading difficulty is persistent in classroom reading tasks involving connected grade-level text.

Summary of Psychoeducational Findings

The primary referral concern is reading fluency. General reasoning and cognitive functioning are broadly within the expected range for age. No global cognitive limitation is identified as the primary explanation for the reading-fluency concern. Teacher information indicates the reading difficulty is persistent in classroom reading tasks. Maya is able to participate in classroom discussion and understand ordinary verbal directions.

Educational Interpretation

The psychoeducational information supports continued educational evaluation of Maya's reading achievement and fluency. Classroom performance and teacher report remain consistent with a reading-fluency concern. This report does not assign a disability category and does not conclude that special education services are required.

Recommendations

Academic assessment of reading achievement and fluency should be completed next, before the team considers eligibility.

This psychoeducational evaluation does not assign a disability category and does not recommend instructional service minutes.
